

To create a static route between 3 routers and 5 network, do like this:

Go to CLI command window then

Router#sh ip rou (this is a shortcut for show IP route)

C 11.0.0.0/8 is directly connected, Serial2/0

here, it shows that we have 3 networks connected! So we must add more

S 192.168.2.0/24 [1/0] via 11.0.0.2

C 192.168.3.0/24 is directly connected, FastEthernet0/0

Router#conf t

configuration t

Enter configuration commands, one per line. End with CNTL/Z.

Router(config)#ip route 12.0.0.0 255.255.255.0 11.0.0.2 add

ip route address, subnet, next hop

Router(config)#ip route 192.168.1.0 255.255.255.0 11.0.0.2

Router(config)#ex exit

Router#sh ip rou

C 11.0.0.0/8 is directly connected, Serial2/0

possible to see which network do you connected to! We miss one network!

S 192.168.1.0/24 [1/0] via 11.0.0.2

S 192.168.2.0/24 [1/0] via 11.0.0.2

C 192.168.3.0/24 is directly connected, FastEthernet0/0

Router(config)#ip route 12.0.0.0 255.255.255.0 11.0.0.2

Router(config)#ex

Router#sh ip rou

C 11.0.0.0/8 is directly connected, Serial2/0

All

networks are added!

12.0.0.0/24 is subnetted, 1 subnets

S 12.0.0.0 [1/0] via 11.0.0.2

S 192.168.1.0/24 [1/0] via 11.0.0.2
[1/0] via 12.0.0.1

S 192.168.2.0/24 [1/0] via 11.0.0.2

C 192.168.3.0/24 is directly connected, FastEthernet0/0
